### About the Center for Architecture

The Center for Architecture is a leading cultural venue for architecture and the built environment in New York City, informed by the complexity of the City's urban fabric and in dialogue with the global community.

The Center for Architecture shares a home with the AIA New York Chapter and has the unique advantage of drawing upon the ideas and experiences of practicing architects to produce thought provoking exhibitions, informative public programs, and quality design education experiences for K-12 students. It also leads New York City's annual month-long architecture and design festival, [Archtober](#).

The Center for Architecture's aim is to further public knowledge about New York City architecture and architects, foster exchange and collaboration among members of the design, development, building, scholarly, and policy sectors, and inspire new ideas about the role of design in communities by presenting contemporary and practical issues in architecture and urbanism to a general audience.
